

Amazon Prime Video — Content Strategy Memo

OTT Streaming Content Trend Analysis

Executive Summary

This analysis examines the Amazon Prime Video catalog across content type, genres, ratings, release years, geographic representation and movie duration. The final recommendations should be populated with the exact values generated by the EDA notebook.

Metric	Value
Total Titles	Fill from notebook
Movies	Fill from notebook
TV Shows	Fill from notebook
Top Genre	Fill from notebook
Top Country	Fill from notebook
Most Common Rating	Fill from notebook
Average Movie Duration	Fill from notebook

Insight 1 — Genre Portfolio

Use the genre analysis to identify the most represented categories and how their representation changes over release years. Add the exact counts and percentages from the notebook.

Insight 2 — Regional Content Mix

Use the country analysis to describe the leading content-producing markets and the geographic concentration of the catalog. Add exact values from the notebook.

Insight 3 — Content Freshness and Format

Use release-year and duration analysis to describe the balance of recent versus older titles and the typical movie-length profile. Add exact values from the notebook.

Recommended Actions

Area	Action
Genre	Maintain strong coverage of established categories while testing selected emerging categories.
Regional	Investigate localized acquisition and production opportunities in underrepresented markets.
Format	Balance new releases with evergreen library titles and use duration/format patterns to guide ac

Data note: In this dataset version, date_added is sparse. Release_year is therefore used as the primary content trend field.
